EDUCATION

National Institute of Technology, Hamirpur

B.Tech in Electronics and Communication Engineering

Aug. 2024 – Aug. 2028 (Expected)

CGPA: 7.1 / 10

Swami Vivekanand Sr. Sec. School

High School

Apr. 2010 – Apr. 2023

Mandi, India

TECHNICAL SKILLS

Languages:	Rust, Go, TypeScript, JavaScript
Rust Ecosystem:	Axum, Tokio, Hyper, Warp, SQLx, Serde, Tower-HTTP
Databases:	PostgreSQL, MongoDB, SQL
Concepts:	REST APIs, WebSockets, Async Runtimes, API Gateways & Proxies
Tools:	Git, GitHub, Docker, Postman, AWS

EXPERIENCE

Open Source Contributor

Openchangelog

2024 – Present

Remote

- Debugged and improved a GitLab changelog source integration across the source, load, and parse pipeline.
- Collaborated with maintainers through GitHub discussions, code reviews, and issue tracking.

PROJECTS

Thyra – Distributed API Gateway [\[GitHub\]](#)

Rust · Hyper · Axum · Tokio

- Built a distributed system in Rust with a custom API gateway and reverse proxy, routing requests to independent backend servers (users, auth) via YAML-based configuration.
- Implemented the gateway from scratch using Hyper for low-level HTTP handling, alongside Axum-based microservices for auth and user management.

Orpheus – Collaborative Music Player [\[GitHub\]](#) | [\[Live\]](#)

Rust · Axum · WebSockets · Next.js (Frontend)

- Built a real-time listening platform in Rust/Axum where multiple users join a shared session and stay synchronized on a queue and playback position.
- Implemented session management and live sync over WebSockets, paired with a Next.js frontend.

AnalogFlix – Analog Horror Streaming Platform [\[GitHub\]](#)

Rust · Axum · Next.js (Frontend)

- Built a streaming platform backend in Rust/Axum serving an analog horror-themed video experience, with a Next.js frontend.
- Used Tower-HTTP for CORS and static file serving, with Request for outbound requests.

Board Track – Board Game REST API [\[GitHub\]](#)

Rust · Axum · Warp · SQLx · PostgreSQL

- Built a REST API in Rust providing full CRUD functionality for tracking board games, their creators, and play counts.
- Used SQLx with PostgreSQL for type-checked queries, comparing Axum and Warp as routing frameworks.

ACHIEVEMENTS

- Solved **250+** **Data Structures and Algorithms** questions and completed the **NeetCode 150** roadmap twice.
- Participated in multiple hackathons including Smart India Hackathon and ComputeHive.
